Your Honor,

If Ma Bell was still the only phone company, would we have phone innovations like caller ID or cellular and pay only 5 cents a minute?

If Microsoft was just another software company, think what innovations in software we might be using today.

Microsoft does not innovate they dictate. Microsoft is a tyrannical monopoly that runs roughshod over the computer industry.

Microsoft has shown contempt towards potential competitors and disregard for the rulings of the US Department of Justice.

Microsoft needs a timeout until they learn to play well with others.
